Fast-Lock-System

Fast-Lock-System (FL) is an alternative quick locking device for banking forms. Change of system without any installation time. Suitable for nearly all die casters with banking unit.

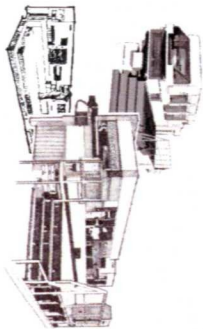

- for using banking tools with BS-holders and fixable system (such as Blank-in-System or Verico)
- enough available space for BS-holders in fixed areas
- very high stability

the fastest program for all casting die casters

QUICKlocking

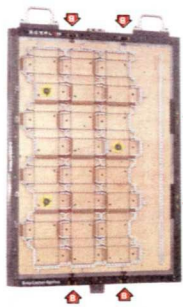

- ▲ reduced set-up time
- ▲ precise Centerline (alignment of tools)
- ▲ easy handling
- ▲ exchangeable tools / compatible

Easy-Locker-System

Quicklocking chase for secure locking of cutting dies. Modification of existing chases with the Easy-Locker-System, incl. 4 magnet locks per chase.

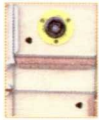

- Special clamping devices have dispensed with the previously time consuming method of first A) and then B) screwing the cutting die into the chase
- 4 magnet locks per chase hold in on longer necessary. This saves the space around the press and investment.

Lock-Fix-System

Lock-Fix-Magnets: Strong magnetically locking of the cutting die at the base plate of the casting chase - no use of screws anymore. The magnets can be use in other, not MVR modified casting chases as well.

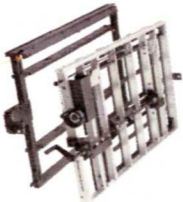

- safety easy and fast locking by using hexagon socket headley
- easy remove of the cutting die after finishing the order
- available in two sizes in 1 and 50 mm (1 and 2 inch) diameter

Speed-Lock-System

Quick locking system for the male stripping form, female stripping board and upper banking tool. The whole stripping forms (Speed-Lock 1 = male, Speed-Lock 2 = female) and upper banking tooling are now fed and centered quickly me by simply turning 2 lever.

The system comprises 3 complete top carrier and 2 bottom locking device (FL) in the cutting cutting and creating process. New equipment with fine adjustment to move sideways with the female stripping board (Speed-Lock 2!)

- Standardized working method in all cutting and creating presses
- fastest loading and unloading of die stripping sandcast
- Accurate positioning and squaring
- No more time consuming aligning and screwing up of the male stripping form, female stripping boards and upper banking tools in conventional stripping/banking forms
- Complete locking with the existing standard (MVR) top 8000
- Centering with the existing standard (MVR) top 8000
- One man operation and easy handling

Goodbest!
